# Fiilex® RPU
Remote Patcher Utility

The **RPU, Remote Patcher Utility**, is a multi-functional tool designed for lighting professionals, able to control and troubleshoot any lighting setup. The Remote tool lets users modify fixture parameters and output on the fly. The Patch tool allows for quick multi-fixture patching and saving patch presets, which can be done wirelessly or through wired connections. The Utility tool lets users view, output, and analyze DMX signals, in addition to updating firmware on all Fiilex fixtures. As with all Fiilex fixtures, the RPU has a rugged, water-resistant design enabling it to perform in the most challenging environments. And with multiple ways to mount and carry, it is a useful item to bring anywhere.
REMOTE

- Full Fixture Control
- Wired and Wireless connection

PATCHER

- Quickly patch Fiilex Fixtures
- Save Patch Presets
- Wired and Wireless Patching

UTILITY

- Update Fiilex Fixtures
- DMX Tester - View/Set/Analyze DMX Levels
