

P3-Series User Guide

P3-Series Setup (TOX)

1. Push & Lock Track Adapter into the Track

- Insert the adapter into the track so that the mechanical key (B) in the adapter aligns with the groove (A) in the track. Rotate the locking lever (C) approximately 90 degrees until it reaches the lock position.
- Use knob (D) to select the circuit the fixture will draw power from.

PSP (US) Type

PSP (EU) Type

2. Connect the Power Cord

- Connect the DC power supply cord and the DMX cord to the light fixture.
- Once connected power on the track and turn the intensity (INT) knob on the light fixture to confirm it is operational.
- Adjust the fixture to the desired angle using the tilt lock lever.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

P3-Series Control Panel Guide
